*Graduate School of Natural Science
and Technology*

Advanced Global Program (AGP)

Master's Degree Program of *Graduate School of Natural Science and Technology*

since April, 2017

Introduction

- This program is aimed for highly-educated professional leaders who can contribute both globally and locally
- This program admits both international (foreign) and Japanese students
- This program is offered in academic year commencing in the spring and occasionally fall term

Spring enrollment (April) : for Japanese and international students
Fall enrollment (October): only for international students

Japanese and international students studying together to become a leader capable of actively working on a global stage

Advanced Global Program (AGP)

Master's Degree Program of *Graduate School of Natural Science and Technology*

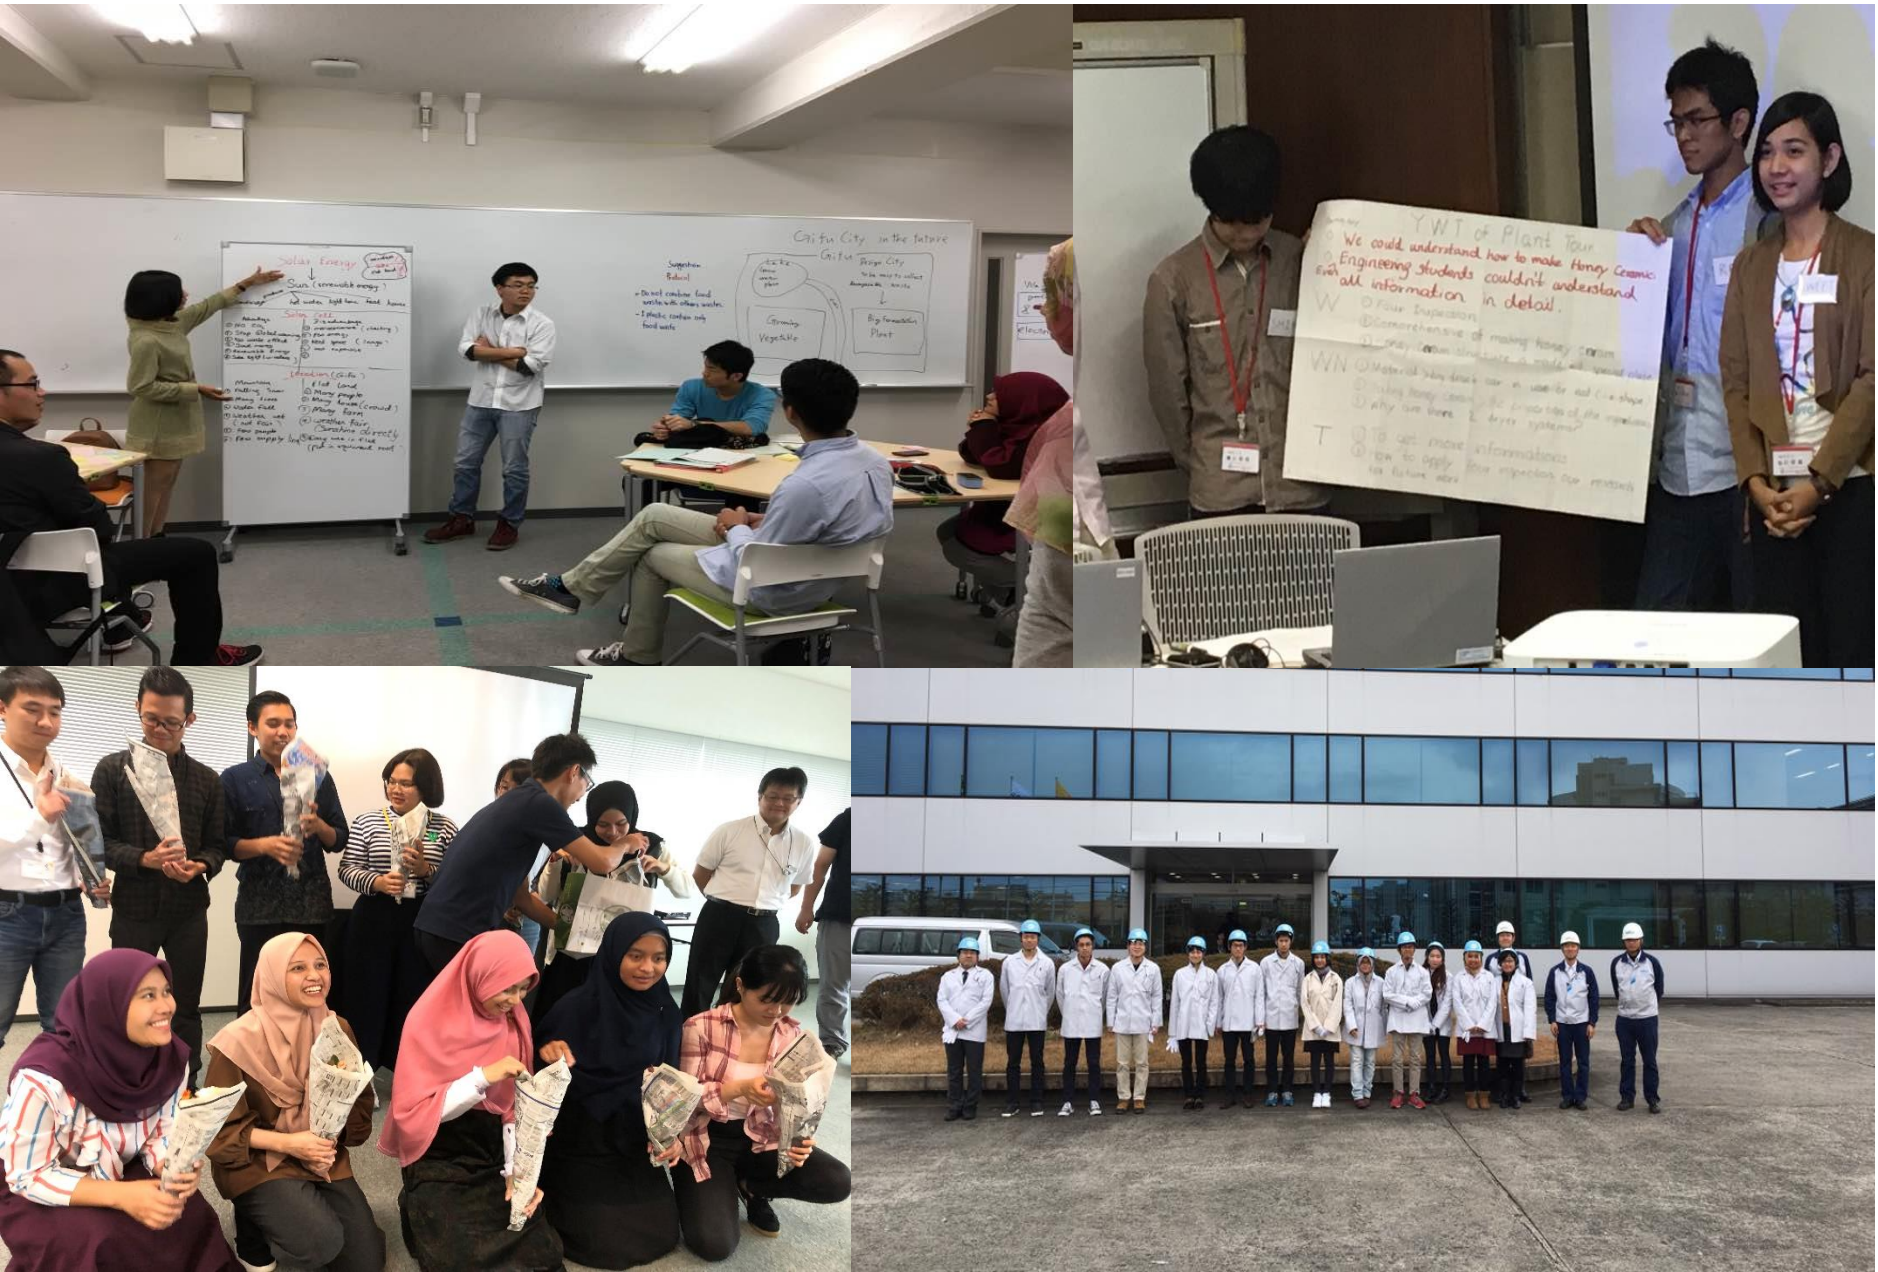

since April, 2017

Features of the Program

- All classes are conducted in English
- In collaboration with partner universities
 - ✓ We undertake collaborative research and lectures in English through mutual visits and strengthen the relationships with partner universities
 - ✓ We admit international students and dispatch Japanese students safely within our overseas partner universities
 - ✓ We promote exchanges among researchers within our partner universities through reciprocal credit-offering lectures
- Job guidance and support for international students

since April, 2017

Engineering Programs

Department of Life Science and Chemistry

- Medicinal Chemistry and Biotechnology
- Applied Chemistry and Biotechnology
- Molecular Life Science

Department Civil and Environmental Engineering

- Environmental Studies
- Disaster Reduction Studies

Department of Materials Science and Processing

- Materials Chemistry
- Materials Processing

Department of Intelligence Science and Engineering

- Intelligent Mechanical Engineering
- Informatics
- Applied Mathematics and Physics

Department of Energy Engineering

- Energy Conversion
- Electrical and Energy System Engineering
